

# 000-993

## IBM

### *WebSphere InterChange Server V4.3 and Toolset, Deployment*

*OfficialCerts.com is a reputable IT certification examination guide, study guides and audio exam provider. We ensure that you pass your 000-993 exam in first attempt and also get high scores to acquire IBM certification.*

*If you use OfficialCerts 000-993 Certification questions and answers, you will experience actual 000-993 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our IBM exam prep covers over 95% of the questions and answers that may be appeared in your 000-993 exam. Every point from pass4sure 000-993 PDF, 000-993 review will help you take IBM 000-993 exam much easier and become IBM certified.*

*Here's what you can expect from the OfficialCerts IBM 000-993 course:*

- \* Up-to-Date IBM 000-993 questions as experienced in the real exam.*
- \* 100% correct IBM 000-993 answers you simply can't find in other 000-993 courses.*
- \* All of our tests are easy to download. Your file will be saved as a 000-993 PDF.*
- \* IBM 000-993 brain dump free content featuring the real 000-993 test questions.*

*IBM 000-993 certification exam is of core importance both in your Professional life and IBM certification path. With IBM certification you can get a good job easily in the market and get on your path for success. Professionals who passed IBM 000-993 exam training are an absolute favorite in the industry. You will pass IBM 000-993 certification test and career opportunities will be open for you.*

**QUESTION: 1**

A collaboration object requires a port type that is external to the collaboration when that port is bound to which of the following?

- A. An adapter agent that is running on another machine.
- B. A web client running on a different machine as the WebSphere InterChange Server.
- C. A collaboration running in a different WebSphere InterChange Server on the same machine.
- D. A collaboration running in a different WebSphere InterChange Server on a different machine.

**Answer: B**

**QUESTION: 2**

The WebSphere InterChange Server fails to start and gives the following error: "Error 11135:Activation of collaboration <collaboration\_name> group could cause a potential deadlock with one or more existing collaboration groups, and is therefore disallowed" Which of the following actions will allow the WebSphere Business Integration administrator to restart the WebSphere InterChange Server so that the administrator can resolve the problem?

- A. Clear the WIP tables and restart the server.
- B. Shut Down the collaboration which will clear the deadlocks.
- C. Add a line DEADLOCK\_DETECTOR\_CHECK=false to the COLLABORATION section in the WebSphere InterChange Server configuration file and restart the server.
- D. Add a line DEADLOCK\_RESOLVER=true to the SERVER section in the WebSphere InterChange Server configuration file and restart the server.

**Answer: C**

**QUESTION: 3**

The purpose of Event Sequencing within the WebSphere InterChange Server architecture is to ensure that:

- A. Events involving the same data entity in an application are processed by the WebSphere InterChange Server in the order in which they occurred in the application.
- B. The same event is not processed concurrently by two Collaborations in the WebSphere InterChange Server.
- C. All events in an application are processed by a Connector Controller in the

WebSphere InterChange Server in the order in which they occurred in the application.

D. All events in an application are processed by a collaboration in the WebSphere InterChange Server in the order in which they occurred in the application.

**Answer:** A

**QUESTION: 4**

A collaboration sends purchase order data to application X through port A. The business process states that before the PO data goes to application X, it must go to application Y through port B to verify the vendor's credit rating. The credit rating verification process can be instantaneous or take up to 24 hours, but should never take more than 48 hours. What is the BEST type of service call to use for port B?

- A. Asynchronous outbound with long lived business process support configured with a timeout value of 48 hours
- B. Synchronous with long lived business process support configured with a timeout value of 48 hours
- C. Synchronous with compensation and long lived business process support configured with a timeout value of 24 hours
- D. Synchronous outbound, no timeout value, although a second synchronous service call will be created to receive the response back from application Y with a configured timeout value of 48 hours

**Answer:** B

**QUESTION: 5**

During collaboration execution, an error in a service call request map causes a ServiceCallException to be thrown. What is the BEST way to identify the root cause of the exception?

- A. Wrap a try-catch block around the suspected failure code in the map.
- B. Use the Exception.getMessage() method to help determine the cause of the service call failure.
- C. Place the following code in the action node, that is called as a result of an exception, following the service call: if (currentException.getType().equals("ServiceCallException"))  
String type = currentException.getType();  
logError("Caught exception " + type );
- D. Place the following code in the action node, that is called as a result of an exception, following the service call: if (currentException.getType().equals("ServiceCallException")) String subType = currentException.getSubType(); logError("Caught exception " + subType );

**Answer:** D

**QUESTION:** 6

When the status for a collaboration object is set to pause, which of the following situations can generate a critical error?

- A. The adapter agent's status is unknown
- B. Any exception that results in a failed collaboration flow
- C. An exception in the event delivery map
- D. Not setting the verb in the event delivery map

**Answer:** A

**QUESTION:** 7

Which of the following two features significantly decrease the amount of time necessary for the WebSphere InterChange Server to reboot during a recovery?

- A. Asynchronous Recovery and collaboration "Blocking Type" is checked.
- B. Asynchronous Recovery and collaboration "Persist Call In Transit State" checkbox is blank.
- C. Asynchronous Recovery and setting maximum number of concurrent events to a higher value
- D. Asynchronous Recovery and storing business object keys as part of the WIP data

**Answer:** D

**QUESTION:** 8

At design time, a collaboration developer is considering whether to add a Dynamic Service Call to the collaboration. All of the following guidelines should be considered EXCEPT:

- A. Dynamic service calls cannot support compensation.
- B. Long-lived business process cannot be a consumer of a dynamic service call.
- C. Long-lived business process can make dynamic service to a connector using JMS as its transport type.
- D. The dynamic service call may not change the event sequencing instance queue.

**Answer:** D

**QUESTION: 9**

A reference-valued business object, received by a collaboration, contains which of the following?

- A. The business object with its Primary Keys
- B. The business object with its ObjectEventId
- C. The business object along with its child objects and its attributes
- D. The business object along with its attributes, but not its child objects

**Answer: A**

**QUESTION: 10**

A collaboration is configured with the "Maximum number of concurrent events" set to 5. The collaboration has 20 flows currently in progress as seen in the Collaboration Statistics window in the System Monitor. Which of the following events will MOST likely cause this behavior?

- A. Web Services events
- B. Server Access Calls
- C. Event triggered flows
- D. Long Lived Business Transactions in the collaboration

**Answer: B**

**QUESTION: 11**

Which of the following pairs of queues are required for exposing a collaboration as a SOAP/JMS web service?

- A. InputQueue and ErrorQueue
- B. InputQueue and InProgressQueue
- C. InProgressQueue and ReplyToQueue
- D. ArchiveQueue and ErrorQueue

**Answer: B**

**QUESTION: 12**

An error occurs during the execution of a scenario. The WebSphere InterChange Server rolls back the scenario, executing the compensation for each sub-transactional step. What is the lowest transaction level of the collaboration that should be used?

- A. Best Effort
- B. Minimal Effort
- C. Normal
- D. Stringent

**Answer:** B

**QUESTION:** 13

In the collaboration code, if two string variables b and c need to be appended, which of the following is the least memory consuming way of achieving this?

- A. `String a = b + c;`
- B. `StringBuffer a = StringBuffer(b)+ StringBuffer(c);`
- C. `StringBuffer a = new StringBuffer();`  
`a.append(b);`  
`a.append(c);`
- D. `StringBuffer a = new StringBuffer();`  
`a = b + c;`

**Answer:** C

**QUESTION:** 14

A map has tested correctly in the Map Designer, but a failure still occurs within the WebSphere InterChange Server (not at the agent) in an end to end flow. What is the MOST likely cause of this problem?

- A. The destination business object in the map did not have its proper calling context value coded and set with a value.
- B. The destination business object in the map did not have its verb value coded and set with a value.
- C. An attribute marked as "Required" in the business object attributes definition was not properly coded and set with a value.
- D. An attribute marked as a "Key" in the business object attributes definition was not properly coded and set with a value.

**Answer:** B

**QUESTION:** 15

During benchmark testing of the WebSphere InterChange Server, it is noticed that the system throughput is being constrained by the large number of calls to the

## OfficialCerts.com Certification Exam Full Version Features;

- Verified answers researched by industry experts.
- Exams **updated** on regular basis.
- Questions, Answers are downloadable in **PDF** format.
- **No authorization** code required to open exam.
- **Portable** anywhere.
- 100% success **Guarantee**.
- **Fast**, helpful support 24x7.
