Question : 1

What range can you specify when choosing the CPU Utilization rating VirusScan 7.0 Enterprise?

- A. 10% to 100%
- B. 15% to 100%
- C. 10% to 90%
- D. 15% to 90%

Answer: A

Explanation:

Current release You can specify an allowable average percentage of CPU utilization for an on demand scan. You can select from 10% to 100% utilization in increments of 10.

Question: 2

What functionality does the Virus Scan 7.0 Enterprise common Framework does provide?

- A. Updating
- B. Scheduling
- C. An Agent
- D. All of above

Answer: D

Explanation:**Common framework**

A common core technologies architecture to allow different McAfee Security products to share the same common components and code. The architecture for this is referred to as the common framework. The Scheduler, Auto Update, and ePolicy Orchestrator agent components are common components that are part of the common framework.

Question: 3

When you perform a replication task the contents of the master repository are mirror to local repository True or False

Answer: A

Repository Replication server task

A task that updates global and Super Agent distributed repositories to maintain identical copies of all packages in all branches that are in the master repository. You can also update selected distributed repositories.

Question: 4

What Utility allow an administrator to reconfigure Virus Scan 7.0 Enterprise software package for installation to another computer

- A. ePolicy Orchestrator
- B. McAfee Installation Design

Answer: B

Question: 5

Using MCDE 2000 database included with ePO server installation what is the estimated number of month of data it can hold 5000 client

- A. 12 month
- B. 15 month
- C. 24 month
- D. 30 month

Answer: C

Question: 6

System variable can now be use anywhere a path name can be entered?
True or False

- A. True
- B. False

Answer: A

Question: 7

How we keep ePO agent deployment size

- A. 3KB
- B. 750KB
- C. 1.22 MG
- D. 1.75 MG

Answer: B

Question: 8

How many Super Agent should be install on a subnet

- A. Only one can reside on a subnet
- B. More than 1 can reside on a subnet But only 1 is recommended
- C. At least 2 to provide redundancy
- D. No more than 2

Answer: C

Explanation:

Deploying Super Agents

Use this procedure to set the policy for Super Agents, and then deploy at least one to every subnet on the network. We recommend that you deploy an additional Super Agent to each subnet as a backup, because agents without an operating Super Agent on its subnet will not receive notification of global updates.
