Network-General

Application Performance Analysis and Troubleshooting

OfficialCerts.com is a reputable IT certification examination guide, study guides and audio exam provider. We ensure that you pass your 1T6-521 exam in first attempt and also get high scores to acquire Network-General certification.

If you use OfficialCerts 1T6-521 Certification questions and answers, you will experience actual 1T6-521 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our Network-General exam prep covers over 95% of the questions and answers that may be appeared in your 1T6-521 exam. Every point from pass4sure 1T6-521 PDF, 1T6-521 review will help you take Network-General 1T6-521 exam much easier and become Network-General certified.

Here's what you can expect from the OfficialCerts Network-General 1T6-521 course:

- * Up-to-Date Network-General 1T6-521 questions as experienced in the real exam.*
- * 100% correct Network-General 1T6-521 answers you simply can't find in other 1T6-521 courses.*
- * All of our tests are easy to download. Your file will be saved as a 1T6-521 PDF.*
- * Network-General 1T6-521 brain dump free content featuring the real 1T6-521 test questions.*

Network-General 1T6-521 certification exam is of core importance both in your Professional life and Network-General certification path. With Network-General certification you can get a good job easily in the market and get on your path for success. Professionals who passed Network-General 1T6-521 exam training are an absolute favorite in the industry. You will pass Network-General 1T6-521 certification test and career opportunities will be open for you.

QUESTION: 1

One component in an application turn is _____.

- A. Server response time
- B. Network process time
- C. Application response time
- D. Client acknowledgement time

Answer: A

QUESTION: 2

When creating a filter in the Sniffer to select only the traffic to or from the client for a particular conversation, the best approach is to focus on a _____.

- A. TCP well known port number
- B. TCP unknown port number
- C. TCP ephemeral port number
- D. TCP port number in the range 512-1024

Answer: C

QUESTION: 3

When using Application Intelligence, Server Time may be defined as _____.

- A. The total time required to send a request and receive a response
- B. The total time packets are on the network for a particular flow
- C. The total time it takes for a packet to travel from client to server based on TCP handshakes
- D. The net time for the server to respond to a client request

Answer: D

QUESTION: 4

A large Window size used by a client could cause _____.

- A. The server to consume more resources
- B. Increased number of ACKs to be sent
- C. Increased delay when frames are lost
- D. None of the above

Answer: D

QUESTION: 5

_____ is the amount of time, based on the engineering of the network, to complete a task.

- A. Throughput

- B. Delay
- C. Access time
- D. Latency

Answer: B

QUESTION: 6

_____ is a protocol used to perform Control and Signaling functions in a VoIP conversation.

- A. Session Initiation Protocol
- B. Real-Time Streaming Protocol
- C. Cisco Skinny Client Control Protocol
- D. All of the above

Answer: D

QUESTION: 7

When reviewing trace data in a multi-tier application, application server requests can be associated with database responses using _____.

- A. TCP port numbers
- B. Request ID
- C. Raw data in the database response
- D. Formatted data in the application response

Answer: A

QUESTION: 8

An application that is sensitive to Jitter is primarily sensitive to _____.

- A. Network congestion
- B. Bandwidth latency
- C. Distance latency
- D. Application turns

Answer: A

QUESTION: 9

What does a Window value of 8760 in a TCP header mean?

- A. The sender is confirming the 8760 bytes have been sent
- B. The sender has 8760 bytes in its buffer
- C. The sender has received a total of 8760 bytes
- D. The sender has buffer space for 8760 more bytes

Answer: D

QUESTION: 10

The TCP 4-way handshake is used to _____.

- A. Indicate the start of a flow of data
- B. Identify the client request parameters
- C. End a connection
- D. Establish a connection

Answer: C

QUESTION: 11

When using Application Intelligence, End-to-End Response Time may be defined as _____.

- A. The total time required to send a request and receive a response
- B. The total time packets are on the network for a particular flow
- C. The total time it takes for a packet to travel from client to server based on TCP handshakes
- D. The net time for the server to respond to a client request

Answer: A

QUESTION: 12

To accurately calculate _____ we must know the slowest link speed in the path between client and server

- A. Distance latency
- B. Congestion delay
- C. Bandwidth latency
- D. Round-trip time

Answer: C

QUESTION: 13

The image below is a view of the Sniffer Summary window. How many application turns are shown?

OfficialCerts.com Certification Exam Full Version Features;

- Verified answers researched by industry experts.
- Exams **updated** on regular basis.
- Questions, Answers are downloadable in **PDF** format.
- **No authorization** code required to open exam.
- **Portable** anywhere.
- 100% success **Guarantee**.
- **Fast**, helpful support 24x7.
