Network-General

Advanced Troubleshooting with InfiniStream Network Mgmt

OfficialCerts.com is a reputable IT certification examination guide, study guides and audio exam provider. We ensure that you pass your 1T6-540 exam in first attempt and also get high scores to acquire Network-General certification.

If you use OfficialCerts 1T6-540 Certification questions and answers, you will experience actual 1T6-540 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our Network-General exam prep covers over 95% of the questions and answers that may be appeared in your 1T6-540 exam. Every point from pass4sure 1T6-540 PDF, 1T6-540 review will help you take Network-General 1T6-540 exam much easier and become Network-General certified.

Here's what you can expect from the OfficialCerts Network-General 1T6-540 course:

- * Up-to-Date Network-General 1T6-540 questions as experienced in the real exam.*
- * 100% correct Network-General 1T6-540 answers you simply can't find in other 1T6-540 courses.*
- * All of our tests are easy to download. Your file will be saved as a 1T6-540 PDF.*
- * Network-General 1T6-540 brain dump free content featuring the real 1T6-540 test questions.*

Network-General 1T6-540 certification exam is of core importance both in your Professional life and Network-General certification path. With Network-General certification you can get a good job easily in the market and get on your path for success. Professionals who passed Network-General 1T6-540 exam training are an absolute favorite in the industry. You will pass Network-General 1T6-540 certification test and career opportunities will be open for you.

Question: 1

Applications that use ephemeral ports on both sides of a connection are difficult to mine, because:

- A. The ephemeral ports cannot be predicted
- B. They all use the same port, TCP/1024
- C. The well-known ports cannot be predicted
- D. The ephemeral ports can be predicted but the port pairings are always different

Answer: A

Question: 2

Mining FTP frames for both the Control and Data connections is difficult, because:

- A. The server listens on TCP/20 and on ephemeral addresses that are difficult to predict.
- B. The server listens on TCP/21 and multiple addresses that cannot be predicted.
- C. The server listens on TCP/21 and ephemeral ports that are difficult to predict.
- D. Many implementations of FTP exist that use varying well-known ports.

Answer: C

Question: 3

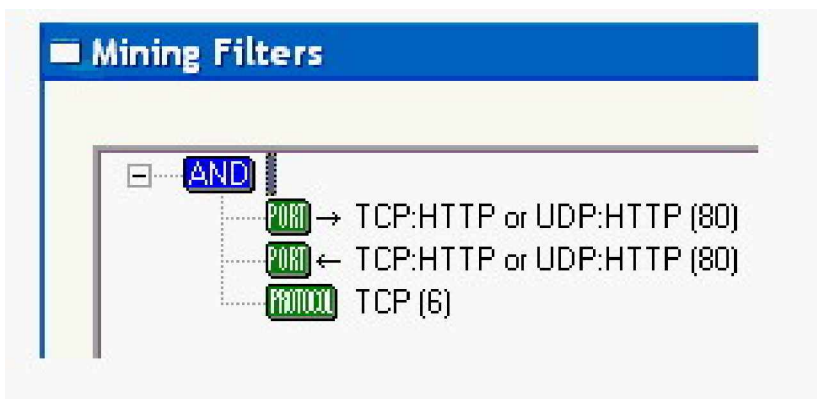

Which of the following is NOT typically associated with network security auditing?

- A. Inspection of passwords
- B. Examining a network for signs of misuse
- C. Troubleshooting network application efficiency
- D. Looking for conformance to policy

Answer: C

Question: 4

Consider this illustration of a data mining filter. What is wrong with it?

- A. The filter only allows packets that are sent to HTTP servers on their well-known port. It would only show commands without replies. This filter is incomplete.
- B. The filter only allows packets that are both to and from the well-known port TCP/80 (HTTP). Both source and destination port cannot be 80. Nothing would pass the filter.
- C. It would also allow UDP packets to and from port 80 (HTTP), which does not make sense, since HTTP is a TCP-based protocol.
- D. Nothing. It will capture normal data to and from TCP/80 (HTTP) servers.

Answer: B

Question: 5

The easiest way to identify data for further analysis is to _____.

- A. create an alias
- B. group multiple protocols together
- C. sort on port number
- D. select all ephemeral ports

Answer: C

Question: 6

A one to many relationship is indicative of:

- A. Backdoors
- B. Clients sending email to a relay server
- C. Password guessing
- D. Peer-to-Peer

Answer: D

Question: 7

Consider this mining filter. Which description most accurately describes what it does?

- A. It includes all packets to and from network 192.168.1.0/24.
- B. It includes all packets that have sources and destinations within network 192.168.1.0/24.
- C. It includes all packets that are not to or from network 192.168.1.0/24.
- D. Nothing. No packets would pass this filter.

Answer: C

Question: 8

Time duration and speed are _____.

- A. primary limitations of mining and analysis
- B. not relevant to InfiniStream
- C. only related to Expert analysis
- D. relevant, but secondary issues

Answer: A

Question: 9

For testing, it is useful to convert your _____ into _____.

- A. data / units of measurement
- B. hypothesis / an if-then statement
- C. hypothesis / a conclusion
- D. conclusion / if-then statement

OfficialCerts.com Certification Exam Full Version Features;

- Verified answers researched by industry experts.
- Exams **updated** on regular basis.
- Questions, Answers are downloadable in **PDF** format.
- **No authorization** code required to open exam.
- **Portable** anywhere.
- 100% success **Guarantee**.
- **Fast**, helpful support 24x7.
