Citrix

Implementing Citrix Provisioning Server 5.0

OfficialCerts.com is a reputable IT certification examination guide, study guides and audio exam provider. We ensure that you pass your 1Y0-A06 exam in first attempt and also get high scores to acquire Citrix certification.

If you use OfficialCerts 1Y0-A06 Certification questions and answers, you will experience actual 1Y0-A06 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our Citrix exam prep covers over 95% of the questions and answers that may be appeared in your 1Y0-A06 exam. Every point from pass4sure 1Y0-A06 PDF, 1Y0-A06 review will help you take Citrix 1Y0-A06 exam much easier and become Citrix certified.

Here's what you can expect from the OfficialCerts Citrix 1Y0-A06 course:

- * Up-to-Date Citrix 1Y0-A06 questions as experienced in the real exam.*
- * 100% correct Citrix 1Y0-A06 answers you simply can't find in other 1Y0-A06 courses.*
- * All of our tests are easy to download. Your file will be saved as a 1Y0-A06 PDF.*
- * Citrix 1Y0-A06 brain dump free content featuring the real 1Y0-A06 test questions.*

Citrix 1Y0-A06 certification exam is of core importance both in your Professional life and Citrix certification path. With Citrix certification you can get a good job easily in the market and get on your path for success. Professionals who passed Citrix 1Y0-A06 exam training are an absolute favorite in the industry. You will pass Citrix 1Y0-A06 certification test and career opportunities will be open for you.

QUESTION: 1

Which step must an administrator take before configuring administrative roles within a Provisioning Server environment?

- A. Create an administrative service account
- B. Create the administrative groups in Active Directory
- C. Grant the farm administrator db_admin rights in SQL
- D. Add the currently logged in user to the local administrator group

Answer: B

QUESTION: 2

Scenario: An administrator is planning a Provisioning Server 5.0 environment for a worldwide organization; there are four offices on two continents. The administrator intends to set up a different farm for each of the four office locations in North America and Europe. How many databases must the administrator plan for when setting up the Provisioning Server 5.0 environment?

- A. Four databases, one for each farm
- B. Two databases, one for each continent
- C. One database to keep all vDisks centralized
- D. Five databases, one for each farm and a back up

Answer: A

QUESTION: 3

For which purpose do target devices use TFTP?

- A. To request and receive a boot file from the TFTP service
- B. To request and receive the IP address of the TFTP server
- C. To contact the Stream Service to stream a vDisk to the target device
- D. To contact the least busy Provisioning Server to stream a vDisk to the target device

Answer: A

QUESTION: 4

According to best practices, what should an administrator do prior to installing Provisioning Server?

- A. Set up a proxy DHCP
- B. Set up the SOAP service
- C. Disable spanning tree portfast mode
- D. Assign a static IP address to each server

Answer: D

QUESTION: 5

Which DHCP option identifies the IP address of the TFTP service?

- A. 60
- B. 66
- C. 67
- D. 69

Answer: B

QUESTION: 6

An administrator is configuring a store that points to the UNC path of the Windows file share where the vDisks are stored. Which two store types could the administrator be configuring in this scenario? (Choose two.)

- A. Site
- B. Farm
- C. Private
- D. Distributed

Answer: A, B

QUESTION: 7

What are the four configuration requirements for a user or system account running the Stream Service? (Choose four.)

- A. Registry read access
- B. Registry read/write access
- C. Domain administration rights
- D. Read/write access to any vDisk location
- E. Datareader/Datawriter permissions to the data store
- F. Read/write access to
- G. \Program Files\Citrix\Provisioning Server

Answer: A, D, E, F

QUESTION: 8

Scenario: An organization has several branch offices. Each branch office will have an administrator that manages target devices for their location. The farm administrator will oversee the branch office administrators and wishes to make role delegation simple and easy to manage. How should the farm administrator lay out the farm?

- A. Configure a single farm store
- B. Set up a farm for each branch location
- C. Create sites according to branch location
- D. Assign each branch location a farm administrator

Answer: C

QUESTION: 9

An administrator needs to ensure that all DHCP broadcasts are allowed through the routers in a network environment. What must the administrator do to ensure communication between target devices and the Provisioning Server are allowed through the routers in the network?

- A. Configure options 66 and 67 on the DHCP server.
- B. Configure the router using the ip helper command.
- C. Enable spanning tree portfast mode on all switch ports.
- D. Disable spanning tree protocol in the network environment.
