Answer: A, D

Question: 12

A single tape-drive Robotic Library is attached to the Backup Exec Server but does not display in the Backup Exec Devices window. The library is in the correct location under the Robotic Libraries tree, but instead of listing the drive underneath it, there is a listing of Unknown Drive. In addition, the drive name is listed under stand-alone drives. What is the probable solution?

- A. Restart the Backup Exec Server service
- B. Power down the Backup Exec Server and attached Robotic Library, and then power up the Robotic Library before powering up the Backup Exec Server
- C. Run the Device Configuration Wizard and drag the correct drive name to the position under the Robotic Library
- D. The Robotic Library is unserialized, which Backup Exec does NOT support. The Robotic Library must be replaced with a serialized Robotic Library.

Answer: C

Question: 13

Backup Exec has been installed successfully, but the physically attached tape drive is not visible within the Backup Exec Administration Console. The tape drive is showing in Microsoft Windows 2003 Device Manager under the Tape Devices branch. Which two actions can be performed to resolve this problem? (Choose two.)

- A. Restart the Backup Exec Server service
- B. Right-click the Devices tree in Backup Exec and select Scan for New Hardware
- C. Verify that the tape drive is on the VERITAS Backup Exec for Windows Servers Hardware Compatibility List
- D. contact the tape drive manufacturer to confirm that there are no problems or updates necessary for the tape drive firmware

Answer: C, D
