Question: 1

When upgrading a SECC Client you get an error When upgrading a SECC Client you get an error cannot overwrite C:\Nortel\lccm\En\crp32.dll.?What must be done previous to the upgrade to resolve this issue ?

- A - Remove all Client peps and reboot the Server.
- B - Make sure that SP5 or SP6a is installed before the upgrade.
- C - Ensure Report Listener is closed down before upgrading the client.
- D - This error is intermittent and if it occurs it can be cancelled and ignored.

Answer: C

Question: 2

Following the installation of the Symposium Express 3.0 server software, what steps must the field engineer take to install PEP5 on the Symposium Express server?

- A - Log on to the NT server as NGenDist, shutdown all applications, and proceed with the PEP installation.
- B - Log on to the NT server as Administrator, shutdown screen savers, and proceed with the PEP installation.
- C - Log on to the NT server as NGenSys, shutdown all applications, including screen savers and proceed with the PEP installation.
- D - Log on to the NT server as NGenDist, shutdown all applications, including screen savers and proceed with the PEP installation.

Answer: C

Question: 3

Before you perform software upgrade from these versions of Symposium Web Client (04.00.037.00 to 04.02.011 .04 inclusive) to a version downloaded from the Nortel web site, what must you do?

- A - Ensure that Active Directory is installed.
- B - Ensure Sybase is installed in the Default directory.
- C - Make sure that SP5 or SP6a is installed before the upgrade.
- D - Download the Microsoft Windows Installer package "CRTEemplates.msi".

Answer: D

Question: 4

A field engineer is performing an upgrade from Symposium Call Center Server 1.5 to 4.0 on a PVI platform. The steps to restoring the database have been completed. An error during the database initialization states: "could not create database". Given that a successful integrity check on the database has been run, what steps should the field engineer perform next?

- A - Key the database in by hand.
- B - Fdisk and format all hard drives, perform the procedure again from the beginning.
- C - Uninstall Symposium Call Center Server, and start the procedure over from that point.
- D - Check the platform recovery disk for database segmentation and contact Nortel Networks support if segmentation is found.

Answer: D

Question: 5

A field engineer at a customer's site is preparing for a Symposium Call Center Server 1.5 to 4.0 migration. In performing the pre-upgrade checks it is discovered that the disk partitions on the 1.5 server are primary partitions. What action should the field engineer take next?

- A - The migration can proceed, making note of the problem. The partitions will be created correctly on the new 4.0 server.
- B - Schedule time with the customer to convert the drives from primary to extended partitions using individual full backups for each drive as time allows.
- C - Perform a database backup on the 1.5 server. Use Disk Administrator to delete the partitions and re-create them as extended partitions. Perform a database restore.
- D - Perform a full backup on the 1.5 server. Fdisk and format the 1.5 server drives. Perform the full restore procedure, ensuring the database drives are partitioned as extended partitions.

Answer: A

Question: 6

A customer is using Symposium Web Client to manage and configure a call center and its users. Active Directory and other tiles are used to store user data. When restoring data in the event of a system failure in this scenario, which statement is TRUE regarding where the Active Directory can be restored?

- A - Onto a remote directory of a network computer
- B - Only onto an application server other than the original server
- C - Only onto the same application server where the backup was created
- D - Onto the same application server where the backup was created or onto a different application server

Answer: D

Question: 7

Once the SMI workbench client software has been successfully installed on the client PC, what are the steps to connect the client PC with the Symposium Call Center Server 4.0?
