Pass4sureofficial.com is a reputable IT certification examination guide, study guides and audio exam provider, we not only ensure that you pass your 920-127 exam in first attempt, but also you can get a high score to acquire Nortel certification.

If you use pass4sureofficial 920-127 Certification questions and answers, you will experience actual 920-127 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our Nortel exam prep covers over 95% of the questions and answers that may be appeared in your 920-127 exam. Every point from pass4sure 920-127 PDF, 920-127 review will help you take Nortel 920-127 exam much easier and become Nortel certified. All the Questions/Answers are taken from real exams.

Here's what you can expect from the Pass4sureOfficial Nortel 920-127 course:

- * Up-to-Date Nortel 920-127 questions taken from the real exam.
- * 100% correct Nortel 920-127 answers you simply can't find in other 920-127 courses.
- * All of our tests are easy to download. Your file will be saved as a 920-127 PDF.
- * Nortel 920-127 brain dump free content featuring the real 920-127 test questions.

Nortel 920-127 certification exam is of core importance both in your Professional life and Nortel certification path. With Nortel certification you can get a good job easily in the market and get on your path for success. Professionals who passed Nortel 920-127 exam training are an absolute favorite in the industry. You will pass Nortel 920-127 certification test and career opportunities will be open for you.

QUESTION: 1

You are configuring the remote site of a multi-site BCM 3.0 network for DHCP. The clients at the remote sites are trying to use the main site as a centralized DHCP server. The local clients are getting IP Addresses, but the remote clients are not. What must be configured to allow the remote clients to obtain IP addresses?

- A. DHCP Server
- B. Excluded Addresses
- C. DHCP Relay Agent
- D. Reserved Addresses

Answer: C

QUESTION: 2

A customer wants you to add a BCM 3.0 to their network and suspects the default settings may cause problems. You decide to connect to the serial port of the BCM 3.0 and use a terminal emulator to check the IP settings. What type of direct connect cable would you use to access the BCM 3.0?

- A. cross-over DB9 female to DB9 male
- B. RS232
- C. null modem DB9 female to DB9 female
- D. RJ45 patch cable

Answer: C

QUESTION: 3

You have just installed a new set for extension 2223. Extension 2223 has target line number 260 which is programmed to appear and ring on the set. You have allowed call log space for this extension, and activated "log all calls". If the user at extension 2223 misses a call, the set does not display "calls for you". What has NOT been programmed?

- A. Increase the Call Log space assigned to extension 2223
- B. Reinstall voicemail and increase the Call Log space
- C. Reset all Call Log space
- D. Call Log Set "Y"

Answer: D

QUESTION: 4

You are installing a BCM 3.0 with a FEM, DSM-16 and DTM. You are having difficulty getting the DSM-16 and DTM to function. Looking at the FEM module you notice all LED's are green next to the fiber ports. What should you do to correct this condition?

- A. Turn off 3 dip switches on the FEM and make sure the DSM-16 and DTM are using those DS-30 resources.
- B. Turn off 2 dip switches on the FEM and make sure the DSM-16 and DTM are using those DS-30 resources.
- C. Turn off 1 dip switch on the FEM and make sure the DSM-16 and DTM are using those DS-30 resources.
- D. Reboot the BCM 3.0

Answer: B

QUESTION: 5

You are configuring NAT on a BCM 3.0 in order to publish an FTP site that is on the private network. The FTP server has an IP address of 192.168.254.21 with a subnet mask of 255.255.255.0. When you build the inbound NAT rule, what do you use for a private subnet mask?

- A. 255.0.0.0
- B. 255.255.255.0
- C. 255.255.0.0
- D. 255.255.255.255

Answer: D

QUESTION: 6

Your customer is currently running in an unreliable network due to service provider outages. They are requesting that IP Trunk calls be routed automatically over the PSTN during these outages. What service would need to be activated and configured to detect these outages in order to allow the calls to be re-routed?

- A. Console Service
- B. Alarm Service
- C. QoS Monitor
- D. Policy Management

Answer: C

QUESTION: 7

A BCM 3.0 with an optional expansion cabinet needs a DS256 adapter cable to be installed. How do you ensure the physical connection is secure?

- A. Ensure the cable is connected to the media services card.
- B. Make sure there is a line connected to the modem card.
- C. Ping the LAN card from the customer's network.
- D. Check the fiber connection on the FEM.

Answer: A

QUESTION: 8

A customer wants to ensure that the default IP settings on a BCM 3.0 will not conflict with the customer's network. What is the default IP address of LAN 1 on the BCM 3.0?

- A. 10.10.11.1
- B. 10.1.1.1
- C. 10.10.10.1
- D. 192.168.254.1

Answer: C

QUESTION: 9

You are configuring a BCM 3.0 for MCDN over IP with a Meridian 1 ITG. The big feature the customer is interested in is tromboning on both forwarded and transferred IP trunk calls. What features must you ensure are enabled in the BCM 3.0 and Meridian 1?

- A. TAT and ICCL
- B. TAT and NAT
- C. TAT only
- D. TAT and TRO

Answer: D

QUESTION: 10

A BCM 3.0 customer has set up a configuration using a primary route and multiple overflow routes with one route designated as an expensive route. Assume that a call has overflowed from one route to another route that has been designated as an expensive route within the same mode. What action will happen on the call?
