

BH0-007

ISEB

ISEB Intermediate Certificate in Software Testing

OfficialCerts.com is a reputable IT certification examination guide, study guides and audio exam provider. We ensure that you pass your BH0-007 exam in first attempt and also get high scores to acquire ISEB certification.

If you use OfficialCerts BH0-007 Certification questions and answers, you will experience actual BH0-007 exam questions/answers. We know exactly what is needed and have all the exam preparation material required to pass the exam. Our ISEB exam prep covers over 95% of the questions and answers that may be appeared in your BH0-007 exam. Every point from pass4sure BH0-007 PDF, BH0-007 review will help you take ISEB BH0-007 exam much easier and become ISEB certified.

Here's what you can expect from the OfficialCerts ISEB BH0-007 course:

- * Up-to-Date ISEB BH0-007 questions as experienced in the real exam.*
- * 100% correct ISEB BH0-007 answers you simply can't find in other BH0-007 courses.*
- * All of our tests are easy to download. Your file will be saved as a BH0-007 PDF.*
- * ISEB BH0-007 brain dump free content featuring the real BH0-007 test questions.*

ISEB BH0-007 certification exam is of core importance both in your Professional life and ISEB certification path. With ISEB certification you can get a good job easily in the market and get on your path for success. Professionals who passed ISEB BH0-007 exam training are an absolute favorite in the industry. You will pass ISEB BH0-007 certification test and career opportunities will be open for you.

Section 1: Sec One (1 to 5)**Details: Scenario**

A computerized system is being created to monitor the life support system on board a submarine. It monitors air quality, water supplies and temperature. This system will be supplied and maintained by SubsInc. SubsInc uses the V-model for software development and conducts four levels of testing, from unit through to operational and site acceptance testing. Two key risks identified for the air quality system are:

1. If the percentage of oxygen in the air falls too low, personnel may suffocate
2. If the concentration of carbon dioxide in the air rises too high, the air may become toxic.

To address these risks, the requirement specification for this system includes the following requirements:

R1) Oxygen must be replaced as it is consumed. R2) Carbon dioxide must be removed from the air. These requirements must be reflected in the functional, technical and program specification documents. You are a newly recruited test manager. A risk register has been produced with the following additional risks identified.

QUESTION: 1

Which one is a product risk associated with the air quality management system?

- A. The system required to monitor oxygen levels may be more expensive than those required to monitor air temperatures.
- B. SubsInc may need to recruit extra developers and testers to deliver the project on time.
- C. Oxygen levels may reach dangerously low levels.
- D. Extreme temperatures may lead to heat exhaustion of personnel.

Answer: C

QUESTION: 2

Which of the following would be an entry criterion into site acceptance testing for the air quality monitoring system?

- A. That the code written to fulfil the requirement to monitor carbon dioxide levels has been 100% path tested.
- B. That the functional specification accurately reflects requirements R1 and R2.
- C. That the system has been tested at levels of oxygen usage well beyond anticipated personnel levels.
- D. That the requirements for temperature control have been signed-off.

Answer: C

QUESTION: 3

Which of the following is an accurate depiction of the hierarchy of test management documentation (where the highest comes first)?

- A. Test policy-Test strategy-Project test plan-System test plan
- B. Test strategy-Test policy-Project test plan-System test plan
- C. Test policy-Project test plan-Test strategy-System test plan
- D. Project test plan-Test strategy-System test plan-Test policy

Answer: A

QUESTION: 4

Which of the following test design techniques would be most suitable for testing that the oxygen is released at the required times?

- A. Decision Testing.
- B. Statement Testing.
- C. Data flow Testing.
- D. Boundary Value Analysis.

Answer: D

QUESTION: 5

When creating the functional specification for the temperature control system, which of the following review types would be most recommended to resolve any issues?

- A. A walkthrough.
- B. A technical review.
- C. A management review.
- D. A code inspection.

Answer: B

Section 2: Sec Two (6 to 10)

Details: Scenario

Your organisation is a large media services corporation (MSC).

MSC uses Agile development, within a Scrum framework. Here, the iterations are referred to as Sprints. For each Sprint, a set of user-stories is defined, built, and tested. The user-stories are typically 1- 2 lines long, indicating what the customer wants the system to do. MSC is in the process of updating its website to meet the recently introduced accessibility rules for websites. Accessibility means the availability of a system suitable to members of the public with, for example, visual or hearing difficulties. It has been decided to start with two requirements, as its first 2 Sprints:

- 1) Presentation of content with clear headings, short sentences, text versions always available.
- 2) Consistent navigation through the website.

You are the test manager and there are four developers and two testers. You have all worked together previously, and are very experienced in MSCs products. Although the accessibility rules are new to you and the team, you have all attended a workshop where they were explained.

QUESTION: 6

Which of the following are product risks and which are project risks?

- a. The navigation through some parts of the website may need to be different from others.
- b. Sprint 1 may not be completed on time, leading to a delay to the start of Sprint 2.
- c. Text versions of images may not always be possible.
- d. There may be a need to buy a capture-replay tool for regression testing.
- e. A key member of the team may leave before the Sprints have been completed.

- A. a, b and c are product risks, d and e are project risks.
- B. a and c are products risks, b, d and e are project risks.
- C. b, c and e are product risks, a and d are project risks.
- D. a, d and e are product risks, b and c are project risks.

Answer: B

QUESTION: 7

Which stage of the Fundamental Test Process will be most affected by the use of user-stories as defined above?

- A. Creating a schedule of activities as part of test planning.
- B. Creating test cases as part of test design.
- C. Creating the test environment as part of test execution.
- D. Assessing requirements coverage at the end of each Sprint.

Answer: B

QUESTION: 8

Which of the following review types would be recommended at the start of each Sprint, for the reason given?

- A. An inspection, to find errors in the user-stories.
- B. A management review, to check that the user-stories will accurately reflect the rules for accessibility.
- C. A walkthrough of the set of user-stories, to ensure that the developers and testers understand what is to be built.
- D. A technical review of the test plan, to ensure that the developers are aware that they must produce good quality code.

Answer: C

QUESTION: 9

Which of the following methods of test estimation would be most appropriate for each Sprint?

- A. Ask the testers to talk to each other and reach a consensus.
- B. Take 30% of the total development time required for the Sprint.
- C. Conduct a test point analysis on the content and navigation requirements.
- D. Use metrics from the last accessibility project at MSC.

Answer: A

QUESTION: 10

Which of the following is the main purpose of an incident tracking process?

- A. To identify the average number of steps required to recreate each incident.
- B. To calculate the average turnaround times per defect.
- C. To identify the priority of each incident.
- D. To understand the status of each incident at any given time.

Answer: D

OfficialCerts.com Certification Exam Full Version Features;

- Verified answers researched by industry experts.
- Exams **updated** on regular basis.
- Questions, Answers are downloadable in **PDF** format.
- **No authorization** code required to open exam.
- **Portable** anywhere.
- 100% success **Guarantee**.
- **Fast**, helpful support 24x7.
